PROFILE

I am a detail-driven software developer focused on creating reliable, high-performance applications using modern web technologies. I enjoy analyzing system requirements, improving architecture, and delivering scalable solutions. I value clean code, efficient processes, and continuous learning. With strong problem-solving skills and a passion for improvement, I build software that enhances usability, supports business goals, and brings meaningful results to users

WORK EXPERIENCE

2025 - PRESENT
Codex solutions

Senior software developer

- Design and maintain scalable software systems, ensuring efficient performance and optimized user experience.
- Analyze technical requirements to identify emerging trends, user needs, and architectural improvements.
